Crypto Wallet - https://metamask.io/ (Install the browser attachment) WRITE DOWN YOUR SEED PHRASE. DO NOT ENTER THIS INTO ANY SITE. IF SOMEONE ASKS YOU FOR THIS, IT IS A SCAM. DO NOT SHARE THIS WITH ANYONE. STORE THIS PHRASE SOMEWHERE SAFE LIKE A FIRE PROOF SAFE.

Buy Crytpo –

KYC Site and 10 day wait on new users after sending in your state issued drivers license. - https://www.coinbase.com/

Simple and easy, some banks do not work with this site, for example JP Morgan Chase does not work. Credit unions seem to work fine through my experience.

Step 1: Creating a Wallet & adding WPLS

1. Open MetaMask in your chrome browser. https://metamask.io/
   a. Proceed through the steps and create a Wallet.
      i. WRITE DOWN YOUR SEED PHRASE. DO NOT ENTER THIS INTO ANY SITE. IF SOMEONE ASKS YOU FOR THIS, IT IS A SCAM. DO NOT SHARE THIS WITH ANYONE. STORE THIS PHRASE SOMEWHERE SAFE LIKE A FIRE PROOF SAFE.

   b. Add the Chrome bar extension.

      i.
   c. Open the wallet and click on import Token.
   d. Enter the WPLS token contract address.
      i. WPLS Token Address: 0xa882606494d86804b5514e07e6bd2d6a6ee6d68a
         1. Once you enter this, the token symbol should auto populate.
         2. Click Next
         3. Click Import
         4. Click the back arrow to see the main account page.
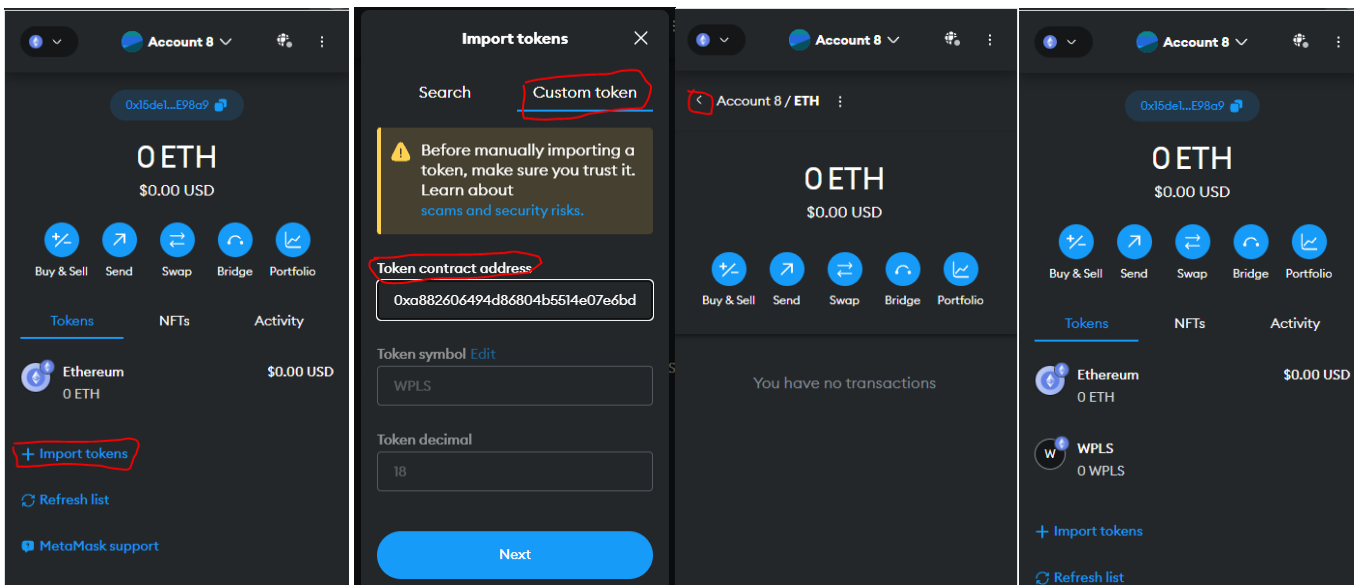

# Step 2: Buying (ETH) Ethereum and sending it to MetaMask

I will use Coinbase for the Example since we are to be good stewards of abiding Tax Laws within the USA. If you want to go a different route that's fine, be sure to pick up at #2 below. If using a different site, it will require the MetaMask wallet address also.

1. Open Coinbase in your chrome browser: https://www.coinbase.com/
   a. Create an account and proceed through the KYC process.
   b. Once your account is created, you can purchase ETH. Purchase the desired amount you wish to invest.
      i. You will need to account for Blockchain Gas fees called GWEI. The larger the amount you invest the more you will need.   a good min. is $100.00 USD.

2. After the 10-day waiting period, send this ETH to your MetaMask wallet.
   a. Open MetaMask wallet in your chrome browser icon.
      i. Click on the copy address button on the account you're working out of. We will use 1 for this example. You will need to paste this into your Coinbase account to send your ETH to your MetaMask wallet. Follow the steps and proceed. Watch your MetaMask wallet. You should see the ETH. Come over. It can take a few minutes sometimes.
      ii.
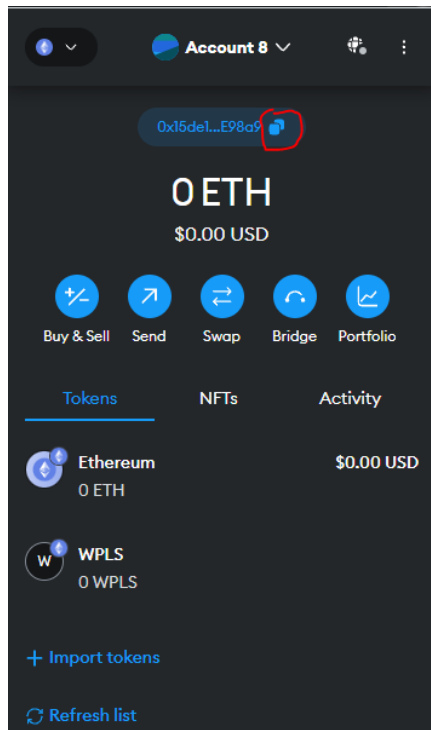

Step 3: Swapping ETH for WPLS on UniSwap

1. Open Uniswap in your chrome browser: https://app.uniswap.org/swap
   a. Click connect wallet, Click on MetaMask.

   b. Click on Select token
      i. enter in the WPLS token contract address,
         1. 0xA882606494D86804B5514E07e6Bd2D6a6eE6d68A
   ii. Click I Understand.

   c. Enter in the desired amount of ETH you wish to swap for WPLS.
      i. Click Swap
      ii. Click Confirm Swap
      iii. Open your MetaMask icon in your chrome browser.
         1. Approve the transaction in MetaMask.

Step 4: Connecting to the Pulsechain Bridge

1. Open the Bridge in your chrome browser: https://bridge.pulsechainapp.com/
2. Click Connect Wallet in the top right corner.
   a. Click MetaMask
   b. Click Account 1 or the account you're working out of
   c. Click Connect
3. Once Connected, your WPLS in our MetaMask wallet should show up on the bridge.
   a. Click Max
   b. Follow the steps and proceed until the transaction is sent.
   c. Wait the estimated completion time for the transaction to bridge from Ethereum Blockchain to the Pulse Blockchain.
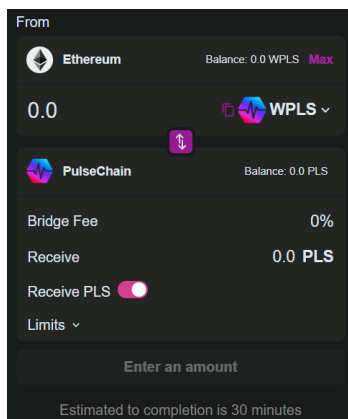

4. Open MetaMask in the Chrome browser extension.
   a. Click the small drop down in the top left corner.
   b. Click on Pulsechain
   c. You should see the amount of WPLS you received after the bridging transaction fee in the form of PLS. It is no longer wrapped PLS because we are now on the Pulsechain.

You have successfully onboarded the Pulsechain.
